

## Systematic Research to Support Ongoing Professional Development

On the shared drive set up four folders to represent the four areas of need:

- Communication and Interaction **(C & I)**
- Cognition and Learning **(C & L)**
- Social, emotional and mental health difficulties **(SEMH)**
- Sensory and/or physical needs **(S&P)**

In each folder, save relevant research papers, videos, resources and photos of interventions in action. The trainees can access these folders for research.

Encourage the trainees to do the same on their own IT system/cloud storage. This help them to start considering their professional development beyond the ITT stage.
